**Creeping Bentgrass Cultivars**

**TYEE**
- Uses: Ideal for greens and tees
- Highest rated bentgrass on sand greens
- Major tournament tested
- High density – all seasons
- Heat and stress tolerant
- Bright, dark green color
- High disease resistance
- Winter-active growth
- Low light tolerant

**SR 1150**
- Uses: Solid performance on greens, tees, and fairways
- SR 1150 and two versatile varieties
- Genetically diverse
- High performance in Transition and stressful climate zones
- Heat tolerance
- Rapid Establishment

**DOMINATOR**
- Uses: Premier choice for greens
- 007 / 777
- Heat and stress tolerant
- Defeats *Poa annua*
- High density – top rated
- Excellent disease resistance
- Genetically diverse for high performance
- Superior in stressful climates
- Low light tolerant
- Proven greens performance

**DOMINANT PLUS**
- Uses: Solid performance on greens, tees, and fairways
- SR 1150 and two versatile varieties
- Genetically diverse
- High performance in Transition and stressful climate zones
- Heat tolerance
- Rapid Establishment

**007**
- Uses: Ideal for greens, tees, and fairways
- Extreme temperature adaptation (Siberia to Texas plains)
- Excellent Dollar Spot resistance
- High turf quality with excellent density
- Dark green genetic color
- Improved cool weather active growth
- Fast establishment
- Versatile

**DOMINANT X-TREME 7**
- Uses: Superior choice for fairways and also greens, and tees
- 007 / SR 1150 / Flagstick
- Dark green, with upright dense growth
- Superior Dollar Spot resistance
- Top ranked for density on greens
- Strong seedling vigor for fast establishment
- Proven performer
- Quick regrowth and recovery from ball marks

**FLAGSTICK**
- Uses: Superior for greens, tees, and fairways
- Superior Dollar Spot resistance
- Excellent turf quality
- High density and fine leaf texture
- Fast establishment
- High resistance to *Poa annua*
- Reduced inputs
- Low Thatch
