CHAMPION GQ
PERENNIAL RYEGRASS
Excellent Quality

WORLD CUP
KENTUCKY BLUEGRASS BLEND
Wear Tolerant

DOMINANT X-TREME 7
CREEPING BENTGRASS BLEND
Superior Performance

TROPHY XRE
TURF-TYPE TALL FESCUE BLEND
Aggressive Tillering

TRADITION
FINE FESCUE MIXTURE
Ecolawn - Links

DEFIANCE XRE
TURF-TYPE TALL FESCUE BLEND
Highly Rhizomatous

4turf™

TETRAPLOID PERENNIAL RYEGRASS

Stress resistance
as a standard

Exceptional color, needs less water
Drought, salt, disease resistance
Outstanding winterhardiness
Stronger Establishment (Cold or Warm)

2020 PRODUCT *Guide*

Bentgrass

Establishment in 7 to 14 days
Use on golf course greens, tees, and fairways.

Creeping

777 (Triple Seven) - NEW! Fine leaf texture. Attractive dark green color. High turf density for Poa annua resistance. Improved resistance to Dollar Spot. Brown Patch and Snow Mold. Fast recovery from ball marks. Cool weather active growth. Uniform turf with high putting quality.

Flagstick - NEW! Superior Dollar Spot resistance. Versatile for greens, tees, and fairways. Excellent heat and cold tolerance. No scalping. Bright, dark green color. High tolerance and rapid repair from verticutting, low Poa annua invasion.

007 - Superior Versatily for Greens, Tees, and Fairways. Excellent Dollar Spot resistance. Heat and cold tolerance. Cool temperature growth. Poa annua resistant. Superior salt tolerance. Broad adaptation. Most widely used bentgrass in the world.

Tyee - High density in all seasons for superior greens. Heat and stress tolerant. High disease resistance. Cool weather-active growth. Bright, dark green color.

SR 1150 - Ideal for greens, tees, and fairways. Excellent turf quality. Excellent Dollar Spot and Brown Patch resistance. Fast establishment. Vigorous growth.

MacKenzie - Excellent wear tolerance. Uniform putting surface. Establishes into Poa annua. High density all seasons. High stress tolerance. Greens, tees, and fairways.

Colonial

Puritan - NEW! Excellent Brown Patch resistance. High turf performance under reduced maintenance. Superior wear tolerance. Heat and drought tolerant. High seedling vigor.

Velvet

Vitagreen - NEW! Low nitrogen and irrigation required. Superior disease resistance. Shade tolerant. Ultra high density and fine texture. Extremely wear tolerant.

4turf™ Tetraploid Perennial Ryegrass

Establishment in 6 to 10 days
Exceptional color, needs less water. Great wear tolerance. Drought, salt, disease resistance. Outstanding winterhardiness, and stronger establishment (cold or warm)

Tetradark (4N) - Dark green color. High turf quality. Excellent winter color. Great wear tolerance.Seedling salt tolerance

Replicator (4N) - Winter hardy. Cold and heat tolerant. Germinates under lower soil temperatures, wear tolerant.

A-LIST APPROVED VARIETY

ALLIANCE FOR LOW INPUT SUSTAINABLE TURF A-LIST

Perennial Ryegrass

Establishment in 6 to 10 days
Use for overseeding, permanent turf alone or with bluegrass and fescues. Endophyte-enhanced for insect resistance

SR 4700- NEW! Superior turf quality, dark green color, Gray Leaf Spot, Red Thread, and Pink Snow Mold resistance, Excellent cold tolerance, and superior wear tolerance.

Sideways - Spreading growth for better wear resistance. High Gray Leaf Spot and Rust Resistance. Drought tolerance and recovery. Winter-active growth. Very dark green.

SR 4660ST - Superior seedling and mature plant salt tolerance. Excellent wear tolerance. Superior drought tolerance. Early spring green-up. Rapid tillering. Disease resistant.

SR 4650 - Highest Gray Leaf Spot resistance. Excellent wear tolerance and stolons for recovery. Fine leaf texture and high density. High salt tolerance. High endophyte.

SR 4600 - Excellent wear tolerance. Spreading growth. High Gray Leaf Spot resistance. Summer stress tolerance and winter-active growth. Dark green. High endophyte.

Hancock - Very dark green color. High turf quality. Fine leaf texture. High tillering. High Gray Leaf Spot resistance. Stress tolerant. Winter-active growth.

Bandalore - High turf quality and resistance to Brown Patch, and Gray Leaf Spot, high wear tolerance.

Intermediate Ryegrass

Establishment in 5 to 8 days
Improved transition for overseeding and excellent nurse grass for permanent turf.

TransAction - Rapid germination and quick cover. Germination under cold soil conditions. Dark green, comparable to perennial ryegrass. Uniform, high quality turf especially in overseeding. Smooth transition to bermudagrass base. Excellent for overseeding or high quality nurse crop.

TransFix - Dark green color and medium fine texture. Transitions smoother in spring for overseeding. Excellent nurse grass. Germination under cooler soil temperatures.

Turf-type Annual Ryegrass

Establishment in 4 to 7 days
Use in winter overseeding or when quick turf is desired under less than ideal conditions.

Candidame - Darker green color, higher tiller density and fine leaf texture.

Tall Fescue

Establishment in 7 to 14 days
Superior stress tolerant turf Southern to Northern areas. Endophyte-enhanced for insect resistance and stress tolerance.

Trending - NEW! Very high turf quality, low or high management. Superior drought tolerance, very dark green color, and aggressive tillering. Good resistance to Brown Patch and Gray Leaf Spot.

Grande 3 - Superior for low maintenance. High density and excellent wear tolerance. Brown Patch and Crown Rust resistance. Rhizomes for recovery. High quality.

Rowdy - High rhizome number. Excellent wear tolerance and recovery. Superior turf quality. High Brown Patch resistance. High stress and low maintenance performance.

Rebounder - High density. Aggressive tillering and rhizomes. Superior wear tolerance. Excellent turf quality with early spring green-up. Stress and drought tolerant.

SR 8650 - Finest textured and very dense, but with high rate of rhizomatous plants. Very high density. Very wear tolerant. Superior stress tolerance.

Guardian 41 - Drought tolerant. Resists wilting. Stays green longer. Excellent wear resistance and recovery. Superior Brown Patch resistance. Dark green genetic color.

Speedway - Fine leaf texture. High density. Dark green color. Early rhizome expression. Superior Brown Patch resistance. Performs under reduced maintenance.

Blackwatch 2 - Very dark green color. Superior density and high tillering. Early development of rhizomes. High turf quality. Salt, drought, and heat tolerant.

Fayette - Very dark green color. Superior density and high tillering. Early development of rhizomes. High turf quality. Salt, drought, and heat tolerant.

Rhizing Moon - Very dark green color. Superior density and high tillering. Early development of rhizomes. High turf quality. Salt, drought, and heat tolerant.

Kentucky Bluegrass

Establishment in 8 to 21 days
Use alone or with ryegrass, tall fescue, or fine fescues for high quality and sod strength. Ideal for fairways, roughs, sports fields, and home lawns.

Arcadia - Midnight-type aggressive. Low mow tolerance. Excellent seedling salt tolerance. High sod strength. High wear tolerance. Dark green. Summer Patch resistance.

Quantum Leap - Midnight-type. High drought tolerance high performance all maintenance levels, excellent sod strength, low mow.

Fielder - American Shamrock-type. Rapid establishment. Excellent traffic tolerance. High year-round density. Early spring green-up. High summer performance. Low maintenance.

Granite - Midnight-type. Dark green. High density. Fine leaves. Great winter color. High Summer Patch resistance. Low mow tolerant. High sod strength.

SR 2100 - Shamrock-type. Big seed for better seedling emergence and establishment. Aggressive growth. Excellent sod strength. Wear tolerant. Summer Patch resistant.

SR 2150 (SRX 5321) - NEW! An Aggressive America-type - Fast germination and establishment. Excellent wear tolerance. Low Poa *annua* and other weed invasion. Medium Green color. High density in all seasons. Low thatch production. Superior drought resistance and recovery.

SR 2284 - America-type. Drought and heat tolerant. Very fine leaf texture and high density. Early spring green-up. Shade tolerant. Rust and Necrotic Ring Spot resistance.

Mercury - America-type. Large seed for fast germination and establishment. Drought tolerant. Superior shear strength. Wear tolerant. Rust and Leaf Spot resistant.

Bandera - TX hybrid-type. Extensive rhizomes. High drought tolerance and recovery. Excellent heat and salt tolerance. High turf quality. Blends well with tall fescue.

Blue Ghost - Secunda hybrid-type: Fast establishment, cool season growth, Stem Rust resistance, and drought tolerant.

Fine Fescue

Establishment in 10 to 21 days
Excellent for shade or low maintenance. Endophyte-enhanced for insect and disease resistance and stress tolerance.

SR 5130 Chewings - Excellent turf quality. High summer stress tolerance. Dark green color. Height of cut from fairway to no mow. High density. Superior wear tolerance.

Ruddy Strong Creeping - NEW! Superior turf quality from high to low maintenance. High salt and recycled water tolerance. Very dark green. High density. Excellent wear tolerance.

SR 5250 Strong Creeping - High turf quality under all maintenance levels. Superior heat tolerance. Full sun or shade. High wear tolerance and recovery. Tolerates all cutting heights.

SR 3150 Hard - Dark green, ultra fine texture, dense, dwarf growth habit, good for fairways to low maintenance landscape, improved Summer Patch resistance, drought tolerant.

Shoreline Slender Creeping - Excellent salt tolerance. Superior heat and shade tolerance. Greens height to no mow. Very fine textured. Cool temperature growth. Wear tolerant.

Quatro Sheeps - Extremely fine blades. Distinct dark green color. Shade tolerant. Fast establishment, but slow growth. Excellent wear tolerance.

Bermudagrass

Establishment in 14 to 21 days in spring to summer
Use for lawns, sports fields, tees and fairways from transition zone South.

Yukon - Most cold tolerant and Spring Dead Spot resistant bermuda. Short internodes for high density. Early spring green-up. Drought tolerant. 25% less water.

Royal Bengal - Unique genetics for superior high humidity and acid soil tolerance. High heat, drought, and salt tolerance. Fast establishment. High turf quality and density.

Royal TXD Blend - Blend of Yukon and Royal Bengal. Fast divot and wear repair. Excellent seedling vigor for fast establishment. Fine textured and dark green.

Specialty

Two Putt Poa reptans - Creeping bluegrass. Uniform dense turf. Very low mow tolerant for greens. Shade tolerant. Repair of damaged Poa greens.

Microclover - Dwarf white clover for lawns. Combine with grass for low maintenance lawns. Reduced inputs. Naturally green. Drought resistant. Crowds out weeds.
